Processed Meat Products:

All of our processed meat products are certified organic and are free of synthetic nitrites/nitrates. Our smoked, uncured bacon does contain celery juice powder which has natural nitrites/nitrates. These products should remain frozen until you are ready to use them. Once thawed, we recommend you consume them within 5 days as they will not store as long as products cured with conventional nitrates. These products should be stored in the refrigerator.

The term "uncured," used to describe our bacon, can be confusing. The traditional process for curing meats uses synthetic nitrates/nitrites and is done as a means of preserving as well as flavoring the meat. Meat that is processed in accordance to organic standards does not use synthetic nitrates/nitrites for preservation and thus must be labeled as "uncured." The meat is tumbled in a brine solution containing organic seasonings and ingredients to impart flavor prior to being smoked.
